Student Technology Assignments

Kindergarten and 1st Grade your assignment is to keep practicing your reading, math and keyboarding skills for at least 20 minutes daily at Abcya, or SmartyAnts.

2nd thru 5th grade your assignments are to practice safe and responsible internet usage when using a computer. You should only go to assigned web sites, or sites approved by a parent or Guardian. Students also need to continue to practice their technology skills by completing their teacher assigned work in IXL, SmartyAnts, Prodigy, or Achieve 3000, and continue their typing practice at typing.com or Nitro type for at least 20 minutes daily.

interactivesites.weebly.com   play.prodigygame.com/   www.IXL.com

www.abcya.com   **www.typing.com**

www.nitrotype.com   **www.Achieve3000.com**

If you are using the Typing.com site please log in with your school user name and password if you remember it, otherwise you can create a new account and use it. It is free, and easy to set up. You can also practice typing without an account as well on this site. Please try your best at being responsible students and completing your technology assignments daily while you are home and away from school. Remember, all the technology practice you do helps you to be a more fluent computer user, a more proficient student, and it also prepares you for your future.

Parents/Guardians if your son or daughter in grades 2nd thru 5th has a problem logging into their own accounts at Typing.com, or Prodigy please send me an email at william.fox@bwcs.k12.az.us and tell me whose class they are in and I will do my best to find their personal login information and get it back to you.

Thank you,

Mr. Fox
