

Your New Find a Doctor Tool

Now available on azblue.com/CHSNetwork

The online tool to search for a healthcare provider in your health plan network[†]— available through azblue.com/CHSNetwork— has changed.

HOW TO USE THE NEW TOOL

- 1 Visit azblue.com/CHSNetwork.**
- 2 Choose “PPO/EPO Statewide”** from the menu next to the “Find a Doctor” orange button.
(When you choose the right plan, you know doctors are for your health plan network.)
- 3 Click the “Find a Doctor” orange button.**
- 4 Click the orange “Confirm” button** on the “Leaving Blue Cross Blue Shield of AZ” pop-up.
(That’s normal—a third-party company provides search results on BCBSAZ’s behalf.)
- Once you’re on that the search tool site...
 - a. Type in a search in the left box**
(such as a doctor’s name or specialty),
 - b. Then type a location in the right box**
(such as an address or a city),
 - c. Then click the light blue “Search” button.**

Added Search Features

Results are displayed in a list and on a map

Re-order results based on distance or alphabetically

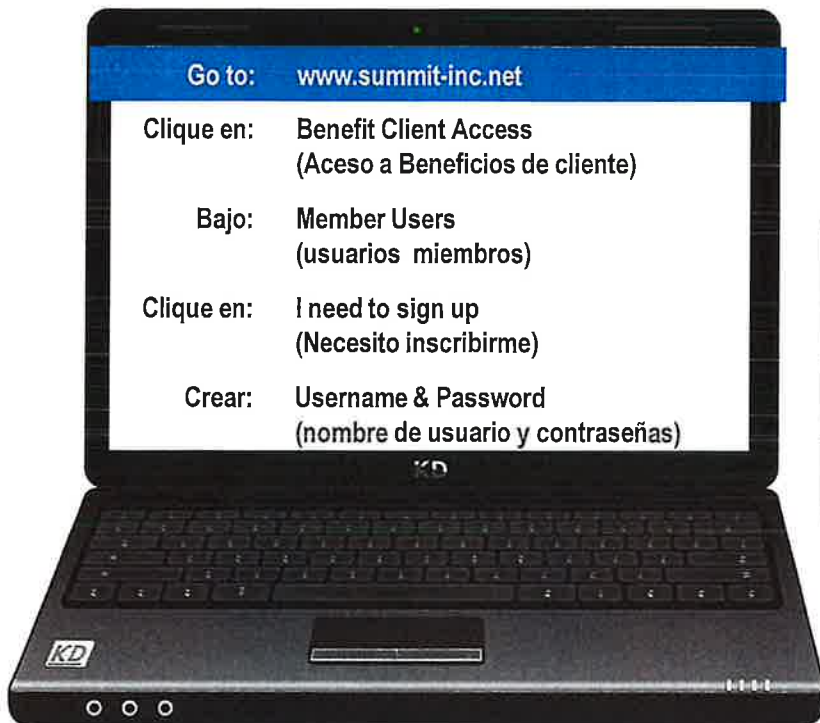

Filter results based on quality certifications, specialties and other categories

(Under “Filter Results,” ignore the box that says, “To find matches in your network, enter the first 3 letters from your Member ID”—changing the information in that box could lead to search results outside your health plan network.)

[†] Your network includes contracts with labs, durable medical equipment suppliers and specialty pharmacies that are outside of Arizona. Those providers will not appear in search results unless you enter the state associated with those providers’ addresses.

Blue Cross Blue Shield of Arizona provides no administrative or claims payment services and does not assume any financial risk or obligation with respect to claims. No network access is available from Blue Cross and Blue Shield Plans outside Blue Cross Blue Shield of Arizona’s service area.
